Should have thought to ask this earlier. They have a PE working on Golf.

**Subject:** Gold King Question

If we were to want PE stamped drawings of the support structures to meet OSHA shoring requirements is that something you could provide? If so do you have an estimate of cost and could it be done in time to mobilize by 9/10? The question arises primarily due to the portal structure being seen by some as equivalent to a field fabricated shoring system and therefore requiring blessing by a PE much like when you use something other than a manufactured trench box in an excavation.

Thanks
